A Kerion tem como missão a aposta na qualidade, na versatilidade, na inovação e o compromisso de responsabilidade social e ambiental. Procuramos a fusão entre sustentabilidade e garantia de oferecer qualidade aliada ao design e à inovação.

Na nossa génese está a vontade e a manifestação de ir mais além na procura de soluções cerâmicas que inspirem a criação de ambientes e espaços onde predominam os valores essenciais de cada um.

Um espaço torna-se único e exclusivo a partir do momento em que oferecemos a possibilidade de combinar a tradição com o moderno ou com o contemporâneo, ou mesmo a ousadia de misturar cores e padrões que permitem a criação de ambientes elegantes, versáteis e acolhedores.

Acompanhando as tendências no domínio da decoração, damos destaque às novas coleções que projeta a cerâmica para uma dimensão mais sensorial, onde as cores, a textura, e as sensações do toque, evocam uma experiência única e impactante.

O conceito aproxima-nos de um design moderno e mais abrangente, inspirado na cultura, nas tradições e na natureza, transmitindo elegância e autenticidade aos ambientes.

Venha descobrir tudo o que a Kerion pode oferecer em produtos de cerâmica de pavimento e revestimento. Entre num universo de cores, texturas e padrões onde tudo se conjuga de forma harmoniosa, ousada e distinta numa verdadeira experiência estética.

#### EN

Kerion's mission is to invest in quality, versatility, innovation, and a commitment to social and environmental responsibility. We seek the fusion of sustainability and the assurance of providing quality combined with design and innovation.

At our core is the desire and manifestation to go beyond in the search for ceramic solutions that inspire the creation of environments where the essential values of each individual prevail.

A space becomes unique and exclusive from the moment we offer the possibility of combining tradition with the modern or the contemporary, or even the daring mix of colors and patterns that allow the creation of elegant, versatile, and welcoming environments.

Keeping up with trends in the field of decoration, we highlight new collections that project ceramics into a more sensory dimension, where colors, texture, and touch sensations evoke a unique and impactful experience.

The concept brings us closer to a modern and more comprehensive design, inspired by culture, traditions, and nature, conveying elegance and authenticity to environments.

Come discover everything that Kerion can offer in ceramic floor and wall products. Enter a universe of colors, textures, and patterns where everything comes together harmoniously, boldly, and distinctly in a true aesthetic experience.

#### FR

Kerion a pour mission de miser sur la qualité, la polyvalence, l'innovation et l'engagement envers la responsabilité sociale et environnementale. Nous recherchons la fusion entre durabilité et l'assurance d'offrir une qualité associée au design et à l'innovation. Dans notre essence réside la volonté et la manifestation d'aller au-delà dans la recherche de solutions céramiques qui inspirent la création d'un cadre où prévalent les valeurs essentielles de chacun.

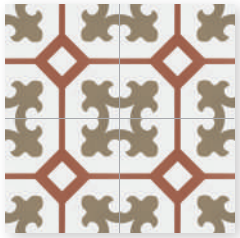

Un espace devient unique et exclusif à partir du moment où nous offrons la possibilité de combiner la tradition avec le moderne ou le contemporain, voire l'audace de mélanger des couleurs et des motifs qui permettent la création d'ambiances élégantes, polyvalentes et accueillantes.

Suivant les tendances dans le domaine de la décoration, nous mettons en avant de nouvelles collections qui projettent la céramique dans une dimension plus sensorielle, où les couleurs, la texture et les sensations au toucher évoquent une expérience unique et impactante. Le concept nous rapproche d'un design moderne et plus global, inspiré par la culture, les traditions et la nature, transmettant élégance et authenticité aux ambiances créées.

Venez découvrir tout ce que Kerion peut offrir en termes de produits céramiques pour le sol et le revêtement. Plongez dans un univers de couleurs, de textures et de motifs où tout se conjugue de manière harmonieuse, audacieuse et distincte dans une véritable expérience esthétique.

Os mosaicos porcelânicos da KERION combinam a inovação técnica com o design exclusivo e inigualável de forma a criar ambientes únicos e exclusivos.

A exclusividade é o coração desta tendência, onde cada mosaico é uma criação única e irreproduzível. O processo de fabrico exclusivo confere um aspeto semi-artesanal que contribui para a sua singularidade, em que cada peça se transforma numa expressão autêntica de habilidade e criatividade, resultando em coleções de mosaicos que transcendem o convencional.

O nosso compromisso vai para além da criatividade e da maestria em representar a beleza dos detalhes, cores vibrantes, estética, ao mesmo tempo que assumimos a responsabilidade na qualidade, na sustentabilidade, na escolha cuidada das matérias-primas e na produção eco consciente.

A KERION, como marca distinta no mundo dos mosaicos inspira a criação de projetos distintos, apelativos, envolventes e originais que despertam emoções e atraem olhares.

EN

The porcelain mosaics from KERION blend technical innovation with unique and unparalleled design to create distinctive and exclusive environments.

Exclusivity lies at the heart of this trend, where each mosaic is a unique and unreproducible creation. The exclusive manufacturing process imparts a semi-artisanal appearance that contributes to its uniqueness, where each piece becomes an authentic expression of skill and creativity, resulting in mosaic collections that transcend the conventional.

Our commitment extends beyond creativity and mastery in representing the beauty of details, vibrant colors, and aesthetics, while also taking responsibility for quality, sustainability, careful selection of raw materials, and eco-conscious production.

KERION, as a distinctive brand in the world of mosaics, inspires the creation of unique, appealing, immersive, and original projects that evoke emotions and capture attention.

FR

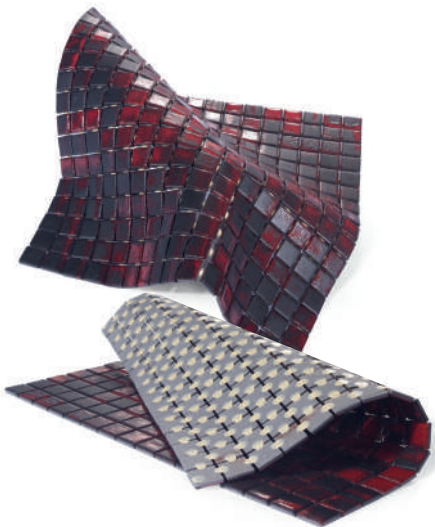

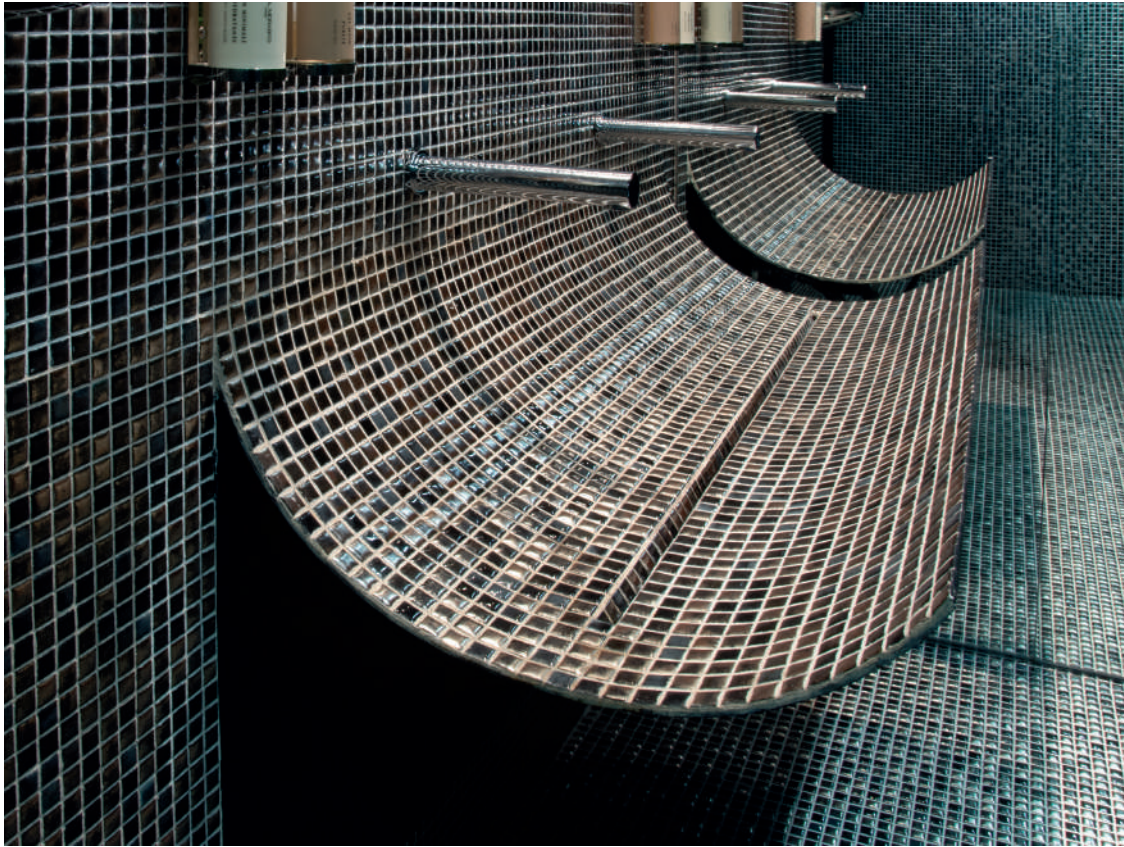

Les mosaïques en porcelaine KERION associent l'innovation technique à un design unique et inégalé pour créer des environnements distincts et exclusifs. L'exclusivité est au cœur de cette tendance, où chaque mosaïque est une création unique et irréprochable.

Le processus de fabrication exclusif confère un aspect semi-artesanal qui contribue à sa singularité, où chaque pièce devient une expression authentique de compétence et de créativité, résultant en des collections de mosaïques qui transcendent le conventionnel.

Notre engagement va au-delà de la créativité et de la maîtrise dans la représentation de la beauté des détails, des couleurs vibrantes et de l'esthétique, tout en assumant la responsabilité de la qualité, de la durabilité, de la sélection soignée des matières premières et d'une production éco-consciente.

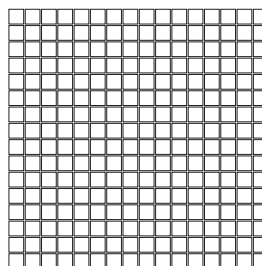

KERION, en tant que marque distinctive dans le monde des mosaïques, inspire la création de projets uniques, attrayants, immersifs et originaux qui éveillent des émotions et attirent le regard.

**Mosaicos de grés porcelânico** prensados em multicamada, usando esmaltes secos e cozidos a temperaturas superiores a 1200°C, fabricados com uma tecnologia sustentável única (nenhuma água é utilizada durante todo o processo de produção, e todas as perdas de produção são reintegradas).

A espessa camada de esmalte seco e as características de grés porcelânico do produto garantem a resistência a condições climáticas adversas, tais como, choque térmico, radiação UV intensa (mesmo com produtos de acabamento metálico) e também a constância das características de cor do mosaico, seja submerso ou fora da água (por exemplo, piscinas, fontes, elementos aquáticos, etc.).

Montagem precisa por sistema de pontos de cola, que garante a constância da junta, a dimensão da folha (não estica, embora seja muito flexível, adaptando-se facilmente a superfícies arredondas) e uma melhor adesividade, devido às características do grés porcelânico e à inexistência de um elemento intermediário entre o produto e a superfície (geralmente uma malha em fibra de vidro).

A montagem através dos pontos de cola, com suas características de adesividade e de flexibilidade, facilita o trabalho de aplicação (a constância da junta acelera o trabalho da aplicação e, sempre que seja necessário cortar peças para cobrir a superfície, o corte pode ser facilmente realizado usando um disco fino de diamante - por exemplo, cortando uma única peça para obter um triângulo para cobrir um pequeno ângulo).

As séries TEXTURE, STONY, CURVES e FUSION, possuem características antiderrapantes, permitindo o seu uso em pavimentos com zonas molhadas (salas de vapor, pisos de chuveiros e banheiros, saunas, etc.)

EN

Dry glazed multi-layer single-pressing porcelain stoneware mosaics, fired at temperatures of over 1200°C, manufactured using a unique sustainable technology (no water is used during the entire production process, and all production losses are reincorporated).

The thick dry-glaze layer and the porcelain stoneware characteristics of the product guarantee the resistance to adverse weather conditions, such as thermal shock, intense UV radiation (even with the metallic finish products) and also the constancy of the colour characteristics of the mosaic, whether it is submerged or outside water (e.g. swimming pools, fountains, water features, etc.)

Precision dot-mount assembly guarantees the constancy of the joint, the dimensions of the sheet (doesn't stretch, although very flexible, easily adapting to round surfaces) and better adhesivity, due to its porcelain stoneware characteristics and the non-existence of an intermediate element between the product and the surface (usually a fiberglass mesh).

The dot-mount assembly, with its adhesivity and flexibility characteristics, make the fixing work easier (the constancy of the joint speeds the fixing work and when pieces need to be cut to cover the surface, it can be easily performed using a thin porcelain or marble diamond covered disk – e.g. cutting a single piece to obtain a triangle to cover a small angle).

TEXTURE, STONY, CURVES and FUSION collections, have anti-slip characteristics, which are suitable to be used in wet areas (steam rooms, shower and bathrooms floor, saunas, etc.)

FR

Les mosaïques en Grès Cérame émaillé sont obtenues par un processus de pressage simple en multicouche, cuites à une température supérieure à 1200°C et produites en ayant recours à une technologie unique et à développement durable (l'eau n'est utilisée en aucune phase du processus et toutes les pertes sont réincorporées).

L'épaisse couche d'émaillage à sec et les caractéristiques du grès cérame émaillé garantissent la résistance du produit aux conditions adverses, telles que les chocs thermiques, la radiation UV intense (même sur les produits ayant une finition métallique), ainsi que la durabilité de la couleur (pas de perte d'intensité) que le produit soit submergé ou non (piscines, fontaines, etc.)

La précision du système de points de colle garantit la consistance de la jointure, la dimension de la feuille (ne s'étire pas, est assez flexible et s'adapte très facilement aux surfaces arrondies) et une grande adhérence, dû aux caractéristiques de grès cérame émaillé et à l'absence d'un matériau intermédiaire entre le produit et la surface ou celui-ci sera appliqué (normalement de la fibre de verre).

Le processus de points de colle, avec ses caractéristiques de flexibilité et adhérence permet une application facile du produit : la consistance de la taille de la jointure accélère l'application et quand les pièces doivent être découpées pour recouvrir une surface, la découpe se réalise en perfection utilisant un disque diamant de grès cérame (ex. découper une unique pièce pour obtenir un triangle et recouvrir un petit angle).

Les séries TEXTURE, STONY, CURVES et FUSION, présentent des caractéristiques antidérapantes, permettant leur utilisation sur des surfaces mouillées (salles de vapeur, sols de douches et salles de bains, saunas, etc.)

# Informações gerais

general information | informations général

## Limpeza Regular

Os produtos em **grés porcelânico vidrado** são reconhecidos pela sua resistência e apelo estético. No entanto, exigem uma limpeza e manutenção regulares para preservar o seu aspecto visual e evitar a acumulação de sujidade, gordura, resíduos, detergentes de sabão, selantes, humidade, líquidos, etc., a fim de prolongar a sua durabilidade.

Deve-se ter cuidado na escolha de produtos de limpeza e técnicas. Produtos químicos agressivos, como lixívia, amoníaco ou vinagre, devem ser evitados, pois podem danificar o vidrado e o rejunte ao longo do tempo. Recomenda-se o uso de produtos de limpeza especificamente formulados para produtos de grés porcelânico e seguir as instruções do fabricante quanto à diluição e aplicação. Não se recomenda a aplicação de selantes nem a limpeza com ácidos concentrados.

Medidas de proteção, como o uso de tapetes de feltro sob as pernas dos móveis e tapetes à entrada, protegem ainda mais os produtos contra o desgaste.

## Varição de Tonalidade

Compreender a variação de tonalidade é crucial. A variação de tonalidade pode ir desde uniforme até moderada ou alta, e cada tipo contribui de maneira diferente para o apelo estético. Misturar de diferentes caixas é essencial, particularmente nos casos em que há uma variação de tonalidade moderada ou alta, para se alcançar uma aparência equilibrada e harmoniosa.

A variação de tonalidade pode ocorrer devido aos diferentes processos utilizados durante a fabricação.

Todas as amostras fornecidas são meramente indicativas de cor e não são vinculativas.

EN

### Regular Cleaning

Glazed porcelain stoneware products are recognized for their durability and aesthetic appeal. However, they require regular cleaning and maintenance to preserve their visual appearance and prevent the accumulation of dirt, grease, residues, soap detergents, sealants, moisture, liquids, etc., in order to prolong their durability. Care should be taken in the choice of cleaning products and techniques. Harsh chemicals such as bleach, ammonia, or vinegar should be avoided, as they can damage the glaze and grout over time. It is recommended to use cleaning products specifically formulated for glazed porcelain stoneware and to follow the manufacturer's instructions regarding dilution and application. The application of sealants and cleaning with concentrated acids is not recommended. Protective measures, such as using felt pads under furniture legs and entrance mats, further protect the products from wear.

### Shade Variation

Understanding shade variation is crucial. Shade variation can range from uniform to moderate or high, and each type contributes differently to the aesthetic appeal. Mixing from different boxes is essential, particularly in cases of moderate or high shade variation, to achieve a balanced and harmonious appearance. Shade variation can occur due to different processes used during manufacturing. All samples provided are merely indicative of color and are not binding.

FR

### Nettoyage régulier

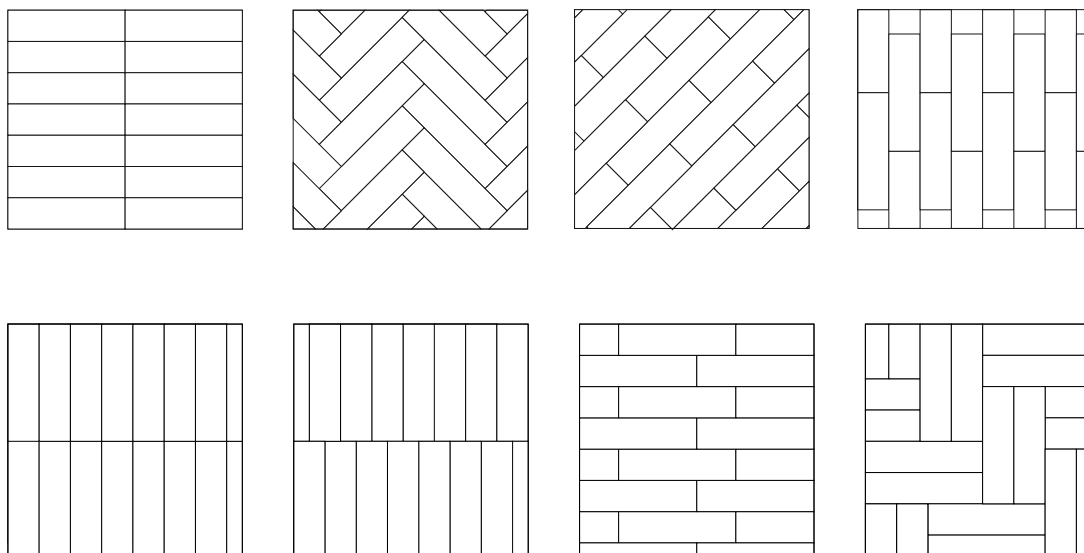

Les produits en grès cérame émaillé sont reconnus pour leur résistance et leur esthétique. Cependant, ils nécessitent un nettoyage et un entretien réguliers pour préserver leur aspect visuel et éviter l'accumulation de saleté, de graisse, de résidus, de détergents, de scellants, d'humidité, de liquides, etc., afin de prolonger leur durabilité. Nous recommandons de choisir avec soin les produits de nettoyage et les techniques. Les produits chimiques agressifs tels que l'eau de Javel, l'ammoniac ou le vinaigre doivent être évités, car ils peuvent endommager l'émail et le joint au fil du temps. Il est recommandé d'utiliser des produits de nettoyage spécialement formulés pour les produits en grès cérame et de suivre les instructions du fabricant concernant la dilution et l'application. Il n'est pas recommandé d'appliquer des scellants ni de nettoyer avec des acides concentrés. Des mesures de protection, telles que l'utilisation de tapis en feutrine sous les pieds des meubles et de tapis à l'entrée, protègent davantage les produits contre l'usure.

### Variation de teinte

Comprendre la variation de teinte est crucial. La variation de teinte peut aller d'uniforme à modérée ou élevée, et chaque type contribue différemment à l'esthétique du carreau. Mélanger le matériel de boîtes différentes est essentiel, notamment dans les cas de variation de teinte modérée ou élevée, afin d'obtenir un aspect équilibré et harmonieux. La variation de teinte peut survenir en raison des différents processus utilisés lors de la fabrication. Tous les échantillons fournis sont indicatifs de la couleur et non contractuels.
