CERÁMICA

En Alaplana trabajamos continuamente con el objetivo de adecuar nuestros productos a la demanda del mercado, mediante procesos de fabricación que permiten la utilización eficaz y responsable de los recursos naturales, respetando el medio ambiente.

Es por ello que centramos nuestra inversión en los sistemas y procesos de fabricación más novedosos, con el fin de obtener un producto actual de alta gama, múltiples acabados (rectificado, espesorado) y con un rango muy variado de formatos, entre los que destacamos el nuevo formato de revestimiento pasta blanca 33.3x90, y 20x20 en porcelánico esmaltado.

CONSEJOS DE COLOCACIÓN DE PRODUCTOS RECTANGULARES

PLACEMENT TIPS OF RECTANGULAR PRODUCTS

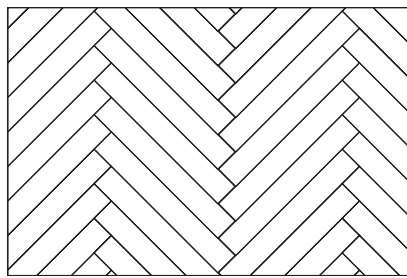

Para una correcta colocación del material y para explotar estéticamente la belleza del producto, Alaplana Cerámica propone las siguientes colocaciones para los formatos 23x120, 22'7x208'l, 30x150, 25x100, con una traba NO superior al 20% del lado de mayor longitud. La empresa declina toda responsabilidad en caso de la no observancia de esta nota.

Colocación trabada (hasta 12cm.)

Colocación regular (separación máxima 12cm.)

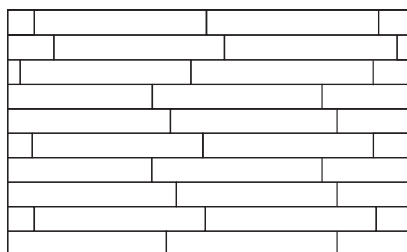

Colocación en espiga 45°

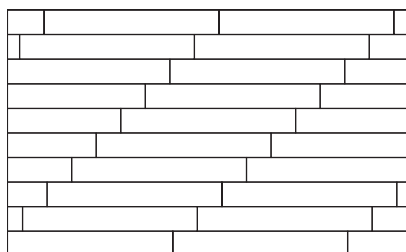

NO RECOMENDADO

Colocación regular a Media Pieza
(no aconsejable)

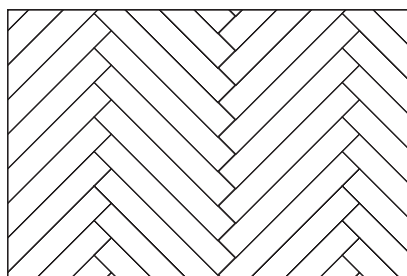

In order to have a correct and aesthetic installation of the tiles, Alaplana Cerámica proposes the following installation mappings for the sizes 23x120, 22'7x208'l, 30x150, 25x100. Do not brick bond them more than a 20% on the long side. Our company will decline any liability if this recommendation is not being followed.

Brick bond installation (up to 20%)

Standard installation (up to 20%)

Herring bone installation 45°

NOT RECOMMENDED

Brick bond installation 50%
(NOT RECOMMENDABLE)

BIM BUILDING INFORMATION MODELING

¿Qué es BIM?

BIM (Building Information Modeling) es un modelo de trabajo colaborativo que, mediante software de diseño avanzado, permite elaborar una réplica virtual tridimensional de un proyecto, implementando en éste toda la información necesaria de los distintos elementos constructivos.

¿Cómo funciona BIM ALAPLANA?

Alaplana ofrece un extenso paquete de objetos BIM que responden a las colecciones cerámicas más innovadoras de nuestro catálogo, perfectas para cualquier uso y espacio. Cada referencia contiene una parte de datos técnicos como dimensión, espesor, resbaladicidad, enlaces url de la serie o colección, etc. También están disponibles las representaciones ya modeladas en lista de cada una de las referencias, para integrarlas directamente en el proyecto y poder realizar representaciones realistas en 3D.

Todos nuestros objetos BIM están integrados en una única BIBLIOTECA BIM, que podrás encontrar para su descarga y uso en: www.nuevaalaplana.es/bim/.

¿Cómo nos puede ayudar?

Integración Ambiental: desde el inicio del proyecto ya se pueden implementar datos reales de su ubicación para saber cómo se va a relacionar la infraestructura con el entorno desde todos los puntos de vista, tanto estéticos como medioambientales.

Diseño: El modelado de los distintos elementos se realiza de una forma precisa y realista, ofreciendo al proyectista y al cliente una imagen real de su proyecto de una forma rápida e intuitiva, y a tiempo real.

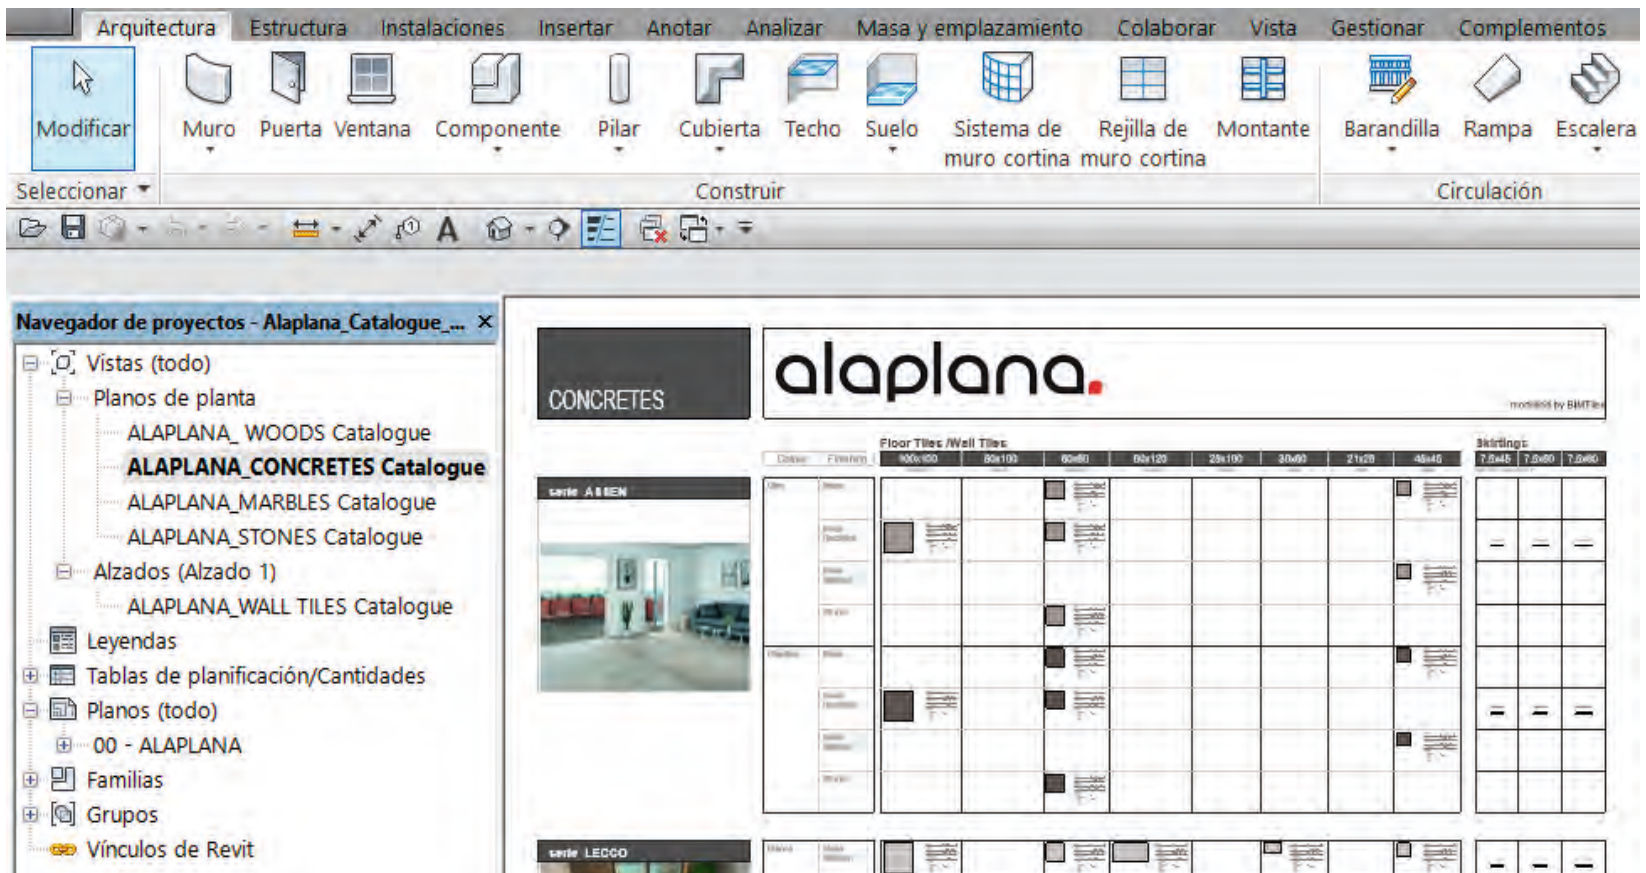

Planificación y Costes: Con la metodología BIM podemos analizar el proyecto en cada fase constructiva optimizando los recursos a emplear, reduciendo los plazos de ejecución de la obra, los sobre-costes y los gastos no previstos.

Construcción: Todas las especificaciones extraídas del desarrollo del modelo BIM se comparten entre todos los agentes que intervienen en el proceso constructivo, sincronizando los trabajos de logística de materiales y métodos constructivos para garantizar una eficiencia óptima.

Mantenimiento: Si durante el uso de la infraestructura es necesario realizar algún mantenimiento o sustitución de cualquier elemento, consultando el modelo BIM encontraremos cualquier información acerca de este elemento. Por ello, la labor de mantenimiento, e incluso de demolición y reciclado, es más rentable y eficiente.

BIM BUILDING INFORMATION MODELING

What is BIM?

BIM (Building Information Modeling) is a collaborative working model that uses cutting-edge design software to create virtual three-dimensional project replicas, incorporating all the necessary information into the various building elements.

How does ALAPLANA BIM work?

Alaplana delivers a wide range of BIM items in line with the most innovative ceramic tile collections featured in our range, which are ideal for all types of spaces and uses. Each project element contains a series of technical data, such as their measurements, thickness, slip rating, etc. as well as their listed modelling, ready for inclusion in the project and the creation of realistic 3D models.

All our BIM objects are included in a single BIM LIBRARY that is available for downloading and use at: www.nuevaalaplana.es/bim/

How can it help us?

Environmental Integration: right from the start, real data regarding the project location can be entered in order to determine how the planned infrastructure will relate to its environment in all aspects, ranging from aesthetic to environmental considerations.

Design: The modelling of the various elements is carried out in the most precise and realistic manner possible, in accordance with the degree of detail required, providing planners and customers with rapid and intuitive real images of their designs, as well as delivering real time views.

Planning and Budgeting: BIM methodology permits precise analysis at each phase of the construction process, thereby ensuring the optimum use of resources, cutting work times and reducing unforeseen expenditure and the risk of going over budget.

Building: Each specification obtained from the BIM process are shared with all the agents involved in the construction process; furthermore, material logistics processes and construction methods can be synchronised in order to guarantee optimum efficiency.

Maintenance: Simply consulting the BIM model will provide all the information needed in the event of maintenance work or the replacement of any elements whilst the infrastructure is in use, thereby ensuring that any maintenance tasks, or even demolition and recycling work, can be carried out efficiently and profitably.
