VARIACIONES CROMÁTICAS CHROMATIC VARIATION

El producto está deliberadamente caracterizado por fuertes variaciones de colores y de vetas que permiten recrear la variedad y la riqueza de los materiales naturales que han inspirado algunas de nuestras colecciones. Por estas razones, durante la colocación del material, es aconsejable mezclar baldosas de diferentes cajas con el fin de garantizar que la superficie acabada tenga un aspecto variado. Las reproducciones de los colores en este Catálogo General se deben considerar como puramente indicativas.

The marked chromatic variation and the veining of the product is an intrinsic feature and re-creation of the randomness and richness of the colour shading of natural stone, the inspiration behind this collection. For these reasons, we recommend installing the product choosing tiles from different boxes in order to guarantee an extremely natural random effect. Due to these intrinsic features of the product, the colours represented in this catalogue must only be considered an example of the many possible colour shades.
